HEMANTH RAJ P

Full Stack Developer • AWS Cloud Enthusiast • Software Developer

Bengaluru, India | 8971063939 | hr814358@gmail.com | GitHub | LinkedIn

PROFESSIONAL SUMMARY

MCA student with hands-on experience across Full Stack Development, AWS Cloud Computing, and Machine Learning. Skilled in building end-to-end web and mobile applications with React.js, Node.js, and Flutter, and deploying cloud-native solutions on AWS (EC2, S3, RDS, IAM, VPC) using Docker for containerized workflows. Delivered multiple production-style projects spanning cloud storage, AI-driven applications, and data analytics, with a consistent focus on clean architecture, security, and scalability. Seeking a Full Stack Developer or Cloud Engineer role to build reliable, high-impact software.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL
Frontend: React.js, HTML5, CSS3, Flutter, Dart
Backend: Node.js, Express.js
Databases: MySQL, MongoDB, SQLite, Hive
Cloud & DevOps: AWS (EC2, S3, IAM, RDS, VPC, CloudWatch, CloudTrail), Azure, GCP, Docker, Git, GitHub
Machine Learning: Pandas, NumPy, Scikit-Learn
Tools: VS Code, Postman, Power BI

PROJECTS

Cloud-Based File Storage System | *AWS S3, Node.js, Express, IAM*

- Built a drag-and-drop cloud storage application that automatically sorts uploads into S3 folders by MIME type, cutting manual file organization to zero.
- Implemented a full CRUD REST API (upload, list, download, delete) and resolved Express 5 wildcard routing issues affecting file path handling.
- Deployed the application on EC2 with IAM role-based access control to enforce least-privilege permissions across storage operations.

AI Food Chef Application | *React.js, Node.js, AWS S3, Claude API*

- Developed a full-stack AI application integrating Google OAuth 2.0 for secure authentication and AWS S3 for scalable asset storage.
- Integrated the Claude API to power ingredient detection and automated recipe generation from user-uploaded images.

Smart Irrigation System | *Python, Scikit-Learn, Pandas, NumPy*

- Built a machine learning model to predict irrigation needs from soil and weather data, reducing manual monitoring effort.
- Automated irrigation scheduling based on model predictions, minimizing water wastage and manual intervention.

Smart Expense Manager App | *Flutter, SQLite, Hive*

- Designed category-based expense logging with interactive spend charts for at-a-glance financial insights.
- Implemented offline-first storage using SQLite and Hive, enabling full functionality with zero network dependency.

Full Stack E-Commerce Website | *React.js, Node.js, MongoDB, JWT*

- Built a complete e-commerce platform covering product listing, cart, checkout, and order management.
- Implemented JWT-based authentication and MongoDB data models to support scalable, secure transactions.

Corporate Card Dashboard App | *Flutter, Dart, REST API*

- Built a responsive transaction-tracking dashboard with real-time API sync and cross-platform Android/iOS support.

E-Commerce Mobile App | *Flutter, Node.js, REST API*

- Delivered an end-to-end mobile shopping flow with Node.js backend integration and responsive cross-platform authentication.

Data Analytics Dashboard App | *Flutter, REST API, Charts*

- Built a real-time analytics dashboard with live API data, interactive charts, filters, and rendering optimizations for large datasets.

EDUCATION

Master of Computer Applications (MCA) — Jain University, Bengaluru | 2025 – 2027
Bachelor of Computer Applications (BCA) — Surana College, Bengaluru | 2022 – 2025
Pre-University Course (PUC) — SRN Adarsh PU College | 2022

CERTIFICATIONS

AWS Academy Graduate (Cloud Developing) • AWS Certified Solutions Architect Associate (Prep) • AWS Certified Developer Associate (Prep) • AWS Certified Security Specialty (Prep) • Microsoft Azure Fundamentals (AZ-900) • Google Cloud Foundations • Power BI Data Methods • Introduction to Web APIs • Microsoft Copilot: The Art of Prompt Writing • Python (Basic) — HackerRank
